

Predict your Salary Pay Band!

This is a Machine Learning GUI. It is built to take your user input and predict your future salary category (pay band), based upon a Data Professional Survey Data set.

Accurately answer the inputs on the left hand side of the screen. Try and base your answers at

the time of degree completion or two years from today. Then press the button below to initiate the machine learning model prediction. Note: Make sure to input all value variables in order to get a prediction. Additionally, erroneous values will cause an error (aka 100 years, etc.).

Find Salary Tier

Your predicted Salary Tier is..... Tier 5 !

There are five Tiers, each incremented in 50k segments. Tier 1 is the lowest and Tier 5 is the highest.

Ferrari's are in your future, you are expected to make over \$200,000 yearly, based upon your inputs.
